CAME TO MARYVILLE 55 YEARS AGO TODAY

JUDGE W. L. JOHNSON TELLS ABOUT MARYVILLE AT THAT TIME.

MARRIED 519 COUPLES

Judge Johnson Has Been a Justice of Peace for Over 27 Years—Came to Maryville From Savannah.

Judge W. L. Johnson, who has been a justice of peace for a longer period than any other man in Nodaway county arrived in Maryville fifty-five years ago today. He has served as a justice for 27 years and three months and during that period he performed 519 marriages.

Judge Johnson came to Maryville from Savannah in a hack owned by our fellow townsman, George D. Davis, and driven by one Joseph Stout. Mr. Davis' father and mother lived at the sixteen mile house where dinner was had.

On arriving in Maryville Mr. Johnson walked in the middle of Main street as far north as Sixth street, hunting the town. There were three brick buildings west of the court house the south one being where the Bee Hive Shoe store is now located, then occupied by Beal & Robinson with a general store, and the other two rooms where Corwin & Murria and Eversole & Son are now located were occupied by hogs, sheep and cattle, there being no floors, windows or doors in them. This was all of the brick business houses in town. There were two brick residences in town then, the old brick house still standing in the northwest part of town, and the other where Dr. C. D. Koch's residence now stands. There was only one church building in town, the Catholic, where the present St. Mary's Catholic Church building now stands. It was also brick. The school house was the building at the northwest corner of Market and Fifth streets.

The bar of Maryville was then Amos Graham, James P. Coover, Mthhew G. Roseberry and Albert P. Moorehouse. The doctors of Maryville were Dr. David Mulholland, Samuel M. Dunn and Dr. Albertson.

There were two saloons here at that time, "Union Hall" where the Montgomery Shoe store now stands, and the other one in the building they called the "Stucco building" where the Candy Kitchen is today. One hotel, the National, where the New Linville now stands, Jonathan Basford, proprietor.

Judge Johnson says Saturday afternoons at that time was the time for the settlement of warthly difficulties in the court of fist cuffs. When there were no difficulties to adjust the people would settle the question as to who was the best fighter in the same way. There are only about twelve persons now residing in Maryville who then resided here.

Breit's farm of 156 acres west of town was taken in on the deal. McCleave has been here for five years, excepting the time he was in the service of the United States and has developed a big business. He has no plans for the future but will remain around Barnard until he has straightened up his business and can probably be found at the Breit Hardware, as the business will now be called.—Barnard Bulletin.

MORE OVERALL CLUBS FORMED, 2600 OKLA. MEN PLEDGED

Movement Spreading All Over Country—Indiana Newspaper Force Takes Up Latest Fashion.

Tulsa, Okla., April 17—Twenty-six hundred oil company employees today pledged to wear their old clothes. The enlistment of the entire city in the movement to cut clothing prices is contemplated.

Indianapolis, April 17—Bill Curry, head of the copy desk of the Indiana Daily Times, came to work today clad in overalls as a protest against the outrageous cost of living. By tomorrow it is predicted the entire staff of the paper will take the latest fashion.

Overall clubs have been formed in a number of cities all over the country and the movement is rapidly spreading.

Overalls would be infinitely more comfortable, cooler, more convenient, cheaper and a possible permanent step toward the simplification of our modern complicated business civilization, it was argued. Few believed that overall men would take advantage of the new demand to raise prices unreasonably. Some advanced the argument that, since a possible permanent addiction to the habit on the part of the general public would be in sight, it would be good business for overall men to actually reduce prices.

SECOND NIGHT PERFORMANCE BEATS FIRST SHOWING

Record Breaking Crowd Sees "Johnny Get Your Gun" at the Empire Theater Last Night.

The second production of "Johnny Get Your Gun" given at the Empire theater last night for the benefit of the American Legion Post, went contrary to the usual run of second night home talent presentations and broke all records of attendance at the theater. Long before the curtain went up, aisle seats and standing room were sold.

Several parties made up of Hopkins, Burlington Junction and Ravenwood people were in attendance and people from all over the county witnessed the play last night.

The reputation of the first night's show in which there was no room for faulty criticism was repeated in the second nights performance. If anything the second performance was better than that of Thursday night in that all the snap and spirit was there with one or two slight roughnesses of the first night smoothed off.

Edward Russell, of New York, director of the production, left this morning for Columbia, where he will superintend the same play for the benefit of the American Legion Post there. From Columbia, he goes to Jefferson City and then to St. Louis, where he has contracts for the same work.

The James Edward Gray Post, for whose benefit the play was given cleared over $400 which will be used for the upkeep of their quarters. The officers and members of the Post wish, through the newspaper, to offer their heartiest thanks to the public who responded so well to their invitations to aid in making "Johnny Get Your Gun" go over the top with a whizz.

Miss Christie Walders of Maryville is in Hopkins spending the week end the guest of Mrs. William Wallace.

STATE TEACHERS COLLEGE READY TO TEST SEED CORN

Corn Growers Are Urged to Send in Their Corn—It is Important to Test Youf Seed Corn.

Test your seed corn. Do not guess. It is more economical to test it in a seed tester than in a corn field. According to statistics, the average germination of Missouri seed corn is 85 per cent. Selection of mature seed in the fall eliminates the most of the poor corn and insures better seed, but even then testing is necessary to weed out all of the inferior seed.

The value of testing seed corn and the various methods used are well known, and many farmers test their seed corn before planting. The State Teachers College is ready to test corn for any of the corn growers in the district who so desire. Send in corn using either of the following methods:

Bring a representative sample of your seed corn consisting of from 50 to 100 ears.

Select 4 to 6 kernels from different parts of each of 50 to 100 representative ears, place in a package and mail to the college.

The first test will show the germination of each ear, and the second the per cent germination of the entire lot. By either method, if the representative samples give evidence of a high per cent of viability, it is safe to assume that the remainder of the corn will show like germinating powers. If the per cent germination is low, it is advisable to test each ear of seed corn.

The best growers maintain that one should plant only pure bred seed corn of high viability and of a variety suited to the soil and the locality.

Results of some germination tests at the State Teachers College this spring are given.

Lot 1. Corn selected from college farm last fall 100 per cent germination.

Lot 2. Shock corn from college farm 60 per cent.

Lot 3. Seed corn bought $4.00 per bushel 86 per cent.

Lot 4. Seed corn bought $4.00 per bushel 83 per cent.

Lot 5. Seed corn especially selected. From the same grower as lot 4. $5.00 per bushel. 97 per cent.

Lot 6. Selected samples from Corn Show 1919. 100 per cent.

In making these tests, the ears showing weak germination were eliminated. The inferior ears in Lot 4 were re-tested to make certain that no mistakes had been made.

PRIZES OFFERED FOR BEST WEEKLY NEWSPAPER

Contest Will be a Feature of Eleventh Annual Journalism week at University of Missouri.

Columbia, Mo., April 16—One hundred dollars in prizes will be given to the publishers of the three best Missouri weekly newspapers composed on the linotype and entered in a contest that will be decided during the eleventh annual Journalism Week of the School of Journalism, University of Missouri, to be held this year from May 3 to 7. The prizes are offered by the Mergenthaler Linotype Company, and will be divided into awards of $50, $30, and $20 for the three highest ranking papers.

Entries in the contest may be made at once by sending copies of three issues of the paper to the Librarian, School of Journalism, Switzler Hall, Columbia, Mo. The awards will be announced at a meeting of the Missouri Press Association, which will be in session Thursday and Friday of Journalism Week.

Each day of the week has been set aside for the consideration of some particular phase of newspaper work, and prominent journalists from the East and Middle West will discuss problems that arise in their respective lines of work. Monday, May 3, will be devoted to the Missouri Writers' Guild, an all-day session ending with a dinner for the Guild members. Tuesday's program has to do with the special features of journalism other than news, and Wednesday will be Advertising Day.

The exercises for Friday, the closing day, are to be featured by the dedication of Jay H. Neff hall, the new $75,000 home of the School of Journalism given by Ward A. Neff, an alumnus, in memory of his father, and the week will close with a sumptuous Made-in-the-Philippines banquet on Friday evening. All the materials for the banquet, including food, decorations, and a large collections of souvenirs for the guests, will be brought to Columbia direct from the Philippines. Prominent Filipino statesmen and American journalists will speak at the banquet.

There is a possibility that arrangements may be made for editors attending Journalism Week to obtain railroad transportation in exchange for advertising, and negotiations towards this end are now under way. No definite agreement has been made on this matter, however, and newspaper men of the state who are in doubt as to the policy of the railroad that serves them should take up the proposition with the General Passenger Agent.

There's always a saving on Wirthmor Waists

There's always a saving on Wirthmor Waists, for the many great economies of the Wirthmor Plan in buying materials, in the making and in the selling of Waists insures that.

Consider these facts: that for several months past, cotton fabrics have cost from 300 to 400% over pre-war days; that trimmings have advanced proportionately; that labor costs have gone up excessively and then you'll wonder as we do, how the prices has kept down so long.

That the price must now be advanced to maintain the quality is not in the least bit surprising; it's surprising rather, that this did not occur a long time since for during these past many months Wirthmor Waists could readily have been sold at $2.00; in fact, would have represented splendid values at that price.

THE NEW WIRTHMOR WAISTS PRICED AT $2.00.

$2.00 is the lowest price at which a worthy Waist can now be sold. Up to this price the Wirthmor folks will hereafter build Waists that will be just as superior to all others at the price as have the Wirthmors in the past at the former price. For these things the word Wirthmor always stand; Style Insurance; Quality Insurance; Economy Insurance; the positive assurance that you are receiving the very ultimate in value for you expenditure.

Wirthmor Waists Can Be Sold in Just One Good Store in Every City.

Less Than a Nickel a Week

This is all that Swift & Company's profit cost the average American family in 1919.

Here are the figures and authorities for them.

The average consumption of meat per person for a year is about 180 pounds (U. S. Government).

The average American family is 4½ persons (U. S. Census).

Swift & Company's profit from all sources in 1919 averaged less than ¼ cent per pound on all products including meat.

This averages for the family less than the price of—

1 cigar **per week** for father, or
1 street car fare **per week** for mother, or
1 package of gum **per week** for the children.

The complex service which we furnish the public is efficient and economical. The cost to the public in the shape of profit is too small to be noticeable in the family meat bill.

Parnell is to have a base ball team this summer, an organization having been perfected this week by the business men of that town. The officers of the association are Frank Giesken, president; Harold Gooden, manager; Charley Baublits, captain; Fred Messbarger, treasurer; Charles Harman, secretary. The club was capitalized at $200. The boys are planning on a good team for Parnell and they will play such teams as Maryville, Stanberry, Maloy, Athelstan, Albany and some of the teams out of St. Joseph. Hayes, an ex-leaguer, will do the pitching while Charley Teeters will be behind the bat. Orville Zeigler of Ravenwood will play second.

There are about twenty-eight species of pines in the United States, of which the white pine, Georgia pine, red pine and the great West Coast sugar pine are among the most valuable.

Returns to Colorado.

Miss Irene Smith of Denver, Colo., who has been visiting Miss Gladys Ford, returned yesterday afternoon to her home.

The area of continental United States is 2,972,890 square miles, and with the non-contiguous territory the area is 3,574,658. The population of continental United States in 1910 was 91,972,266, and on July 1, 1918, the estimated population was 105,253,300.

The harvest acreage of 1919 in the United States was 2,654,311 acres greater than in 1918.

The United States, with 106,000,000 inhabitants, has 7,602,000 automobiles—one for every 14 persons. In the rest of the world 1,565,000,000 persons own a total of 717,000 automobiles, or one for every 2,182 persons.

If the electricity now generated annually in the United States could be used in a single gigantic nitrogen lamp, it would almost equal the sun itself in brilliancy.

Modesty in New Styles.

"Quiet and quaintly demure" is the keynote of London's new styles, as revealed by Paquin's Spring show says the International News Service.

"The daring maiden of yesterday has given place to a girl of blushing modesty and demureness," says one writer on the new styles.

"Frocks which have slipped down from the knee to a coy point of vantage somewhere about the ankle were seen in every guise and style.

"Even the extreme openness of last winter has given way to a modest low neck in dinner and dance frocks and a high covering or a little square for day dress.

"The bare back, the extreme V neck, the sleeveless frock, all have been discarded by the fashion makers this Spring. Woman has ceased to startle except in color effects, which are flamboyant and novel."

The Gasoline Problem

THE grave problem confronting the serious-minded men in the petroleum industry today, is to keep pace in production with the seven-league strides of the demand for gasoline.

In ten years the production of crude oil in the United States has increased only 96 per cent, while during the same period the output of gasoline has increased 560 per cent.

The demand for no other commodity in general use has increased to a degree that even approximates the mark reached by gasoline.

In ten years the Standard Oil Company (Indiana) has increased its output of gasoline from 150 million gallons to more than 600 million gallons a years.

It is apparent that this could not have been accomplished except by intensive application of improved, scientific methods of refining.

As a matter of fact, the price of gasoline is held in bounds only by the sheer force of science.

Except for the ability of such institutions as the Standard Oil Company (Indiana) to make a wide range of useful products from that part of the crude oil which is not used to make gasoline, you would be paying a much higher price for gasoline than you pay today.

The Standard Oil Company (Indiana) is bending every effort to increase its output of gasoline to meet the demands and to sell it to you at as low a price as possible.

Prove beyond question that the CALORIC heats more uniformly and more efficiently than any other system—and positively saves ⅓ to ½ the fuel. This remarkable economy record is due, first—to the fact that the CALORIC has no expensive heat-wasting pipes—and secondly—to the fact that the CALORIC draws the cool air out of your rooms in the same volume that it pours warm air in. This air-circulation results also in the air throughout your home being constantly purified, with a complete change of air practically every 15 minutes.

For Old Homes or New

The CALORIC may be installed in old homes as easily as in new—in one to two days' time. It is low in first cost, low in upkeep. No pipes, no plumbing and only one register. FAINTING AND DIZZY SPELLS

The Cause of such Symptoms and Remedy Told in This Letter.

Syracuse, N. Y.—"When I commenced the Change of Life I was poorly, had no appetite and had fainting spells. I suffered for two or three years before I began taking Lydia E. Pinkham's Vegetable Compound and the Liver Pills which I saw advertised in the papers and in your little books. I took about twelve bottles of your Vegetable Compound and found it a wonderful remedy. I commenced to pick up at once and my suffering was relieved. I have told others about your medicine and know of some who have taken it. I am glad to help others all I can."—Mrs. R. E. Deming, 437 W. Lafayette Ave., Syracuse, N. Y.

While Change of Life is a most critical period of a woman's existence, the annoying symptoms which accompany it may be controlled, and normal health restored by the timely use of Lydia E. Pinkham's Vegetable Compound.

Moreover this reliable remedy contains no narcotics or harmful drugs and owes its efficiency to the medicinal extractives of the native roots and herbs which it contains.

Drive this New

CHALMERS

to Estimate Its Worth

WHEN you have driven this new Chalmers you will appreciate its marvellous ease of action, its soothing absence of vibration, its great energy—results directly traceable to the Hot Spot and Ram's-horn.

Hot Spot is an ingenious device that occupies about six square inches. It receives from the carburetor gasoline still in a raw, heavy state and breaks it up into infinitesimal particles.

Then the gasoline, now a "cloud" of dry gas, is rushed into the cylinders via Ram's-horn (which has no sharp corners to impede the progress).

Thus the cylinders get the kind of "food" they should have, and you get a snap, a "kick" from "gas" that you haven't seen in many a day.

Some things you don't get, too, and they are burned bearings, scored cylinders, frequently fouled spark plugs—all traceable to inferior "gas" which most engines cannot "digest."

Ride in this new Chalmers and you, too, will say: "Chalmers is one of the few great cars of the world."
